

Ibnu Nashir Khuluq

Front End Developer

0851 3726 9035 | ibnunashirk@gmail.com | [linkedin.com/in/ibnunashirk](https://www.linkedin.com/in/ibnunashirk) | Bandung, Indonesia

Graduated from Senior High School ISTIQAMAH Bandung. Career switcher passionate about web development. Graduated Full-Stack Web Developer bootcamp program from harisenin.com. Now, I create clean, responsive websites using technologies like React, JavaScript and Next.js.

Work Experience

CV Rudi & Rekan - Bandung, Indonesia

Sep, 2023 - Dec, 2023

Tax Staff

- Calculated, prepared, and reported taxes such as VAT, Income Tax Article 21, 23, and 25 according to the schedule.
- Assisted in reviewing tax documents to maintain accuracy and completeness.
- Successfully completed tax reporting within the given deadlines without delays.

Project Experiences

Shoppedia - Self Project

May, 2025 - June, 2025

Front-End Developer

- Developed a responsive e-commerce web application using Next.js and Tailwind CSS, showcasing products across categories like Electronics, Fashion, and Home Goods.
- Implemented core features such as product listing, category filtering, add to cart, and newsletter subscription.
- Utilized Zustand for global state management, enabling efficient handling of cart operations and user interactions.
- Integrated toast notifications for real-time user feedback on actions like adding items to the cart.
- Deployed the application on Vercel for optimized performance and scalability.

Videobelajar - Project Harisenin.com

May, 2025 - May, 2025

Front-End Developer

- Developed a responsive e-learning website using Next.js and Tailwind CSS as part of a frontend developer portfolio.
- Built core pages including Home, Login, and Register, with full API integration for user authentication and data handling.
- Designed a clean, mobile-friendly interface to showcase video-based learning content.
- Deployed the project on Vercel for fast and reliable performance.

Nongkrong Bandung - Self Project

May, 2025 - May, 2025

Front-End Developer

- Built a responsive web application using React and Tailwind CSS to showcase recommended hangout spots across Bandung.
- Designed and implemented a dynamic interface displaying location cards with essential details like name, location, and description.
- Enabled users to submit reviews directly on each card to share their experiences and feedback.
- Focused on clean UI, mobile-first design, and smooth user interaction using React's component-based architecture.
- Deployed the application using Vercel for reliable hosting and fast performance.
